Magical Potions

This is a big hit! Children squeeze citrus fruit juices from cut fruits into colored water. Then the “magic powder” (baking soda) is added to get the fizz for the potion. They also add petals from a choice of fresh flowers on the table for color and added fragrance. It smells wonderful and looks so pretty. We mix these using small glass lab beakers that - makes it more “science-y”. We can also add glitter for a little extra sparkle.

When we finish, Everyone is given a tiny glass corked bottle to decorate and bring home some of their potion.

Magic Wands

PIC•COLLAGE

These wands have wooden figures that are decorated and attached to a dowel with embellishments. This is a good one to go with the potions and they are super popular with both girls and boys.

Stuffies

PIC·COLLAGE

Children select from different animal “skins” that are filled, similar to a "Build A Bear" setup without the large stuffing machine. They stuff the skins by hand, adding a small heart inside before closing the animal with a zip Tie inside of the skin. Then it is closed with a Velcro strip which is sewn into the

animal's back, so no sewing is required. They are easy to make.

Once the animal is formed, a customized t shirt for it to wear is made using fabric markers and patches that are heat pressed onto the shirt. There are many different colors of shirts and styles of patches.

Following are some examples of style choices, but there are more options.

This is a popular option and good for any age group. However, it is a more expensive choice. See price options at the bottom of the document for details.

Slime Bar

We set out multiple ingredients for a DIY slime bar. This includes the basic slime ingredients plus shaving cream, clay, scents, glitters, polymer clay slices and other possible ingredients that can be added to slime. We could do the slime in a theme if that would be preferred- just tell us your idea and we can do our best to make it happen!

PoP (Plaster of Paris) Treats

Kids are provided with choices of unfinished plaster popsicles, donuts and cakes. They are given tempera paints in primary

colors, do some color mixing and then paint and decorate their creations.

This is a good one for a multi-age party. It is a crowd pleaser! Here's a photo of some treats.

Playdough Worlds

(These can be done in gluten-free playdoughs.) Children decorate and embellish the doughs and select different items to put in their themed kit. Its all taken home in a box.

There are different themes like construction, dinosaurs, mermaids, unicorns, pirates, etc. Once the kit is assembled, they can play with the items and make “scenes” and small environments.

Mini Birthday Cakes

These are easy and fun. We create and decorate these tiny polymer multilayer “cakes” that are then baked in the oven to harden and make durable. They are very cute!

Jewelry Bar

With this option, everyone can make a choice of 2 pieces of jewelry- bracelets, necklaces, hair clips, earrings and keychains. There would be multiple choices of themes. Some options, such as hair accessories and some keychains require the use of a low temperature hot glue gun. Please discuss in advance with ArtJack staff if you would like to do activities that require the hot glue gun.

Due to time constraints, only single activity parties are able to choose this option.
